

Profile

React Developer with 1 year of frontend development experience in React.js, Next.js, JavaScript, and WordPress. Skilled in building responsive web applications, REST API integration, website deployment, SSL configuration, bug fixing, maintenance, and client-requested changes. Hands-on experience with Node.js, MySQL, and MongoDB.

Technical Skills

Languages & DB — JavaScript, SQL, MySQL — database design, schema modeling, CRUD operations
Frontend & Tools — HTML, CSS, Bootstrap, React.js (basics), Git, GitHub, Maven, Postman
Backend — Node.js, MongoDB, Mongoose, REST APIs, Redux
Security — JWT Authentication, bcrypt, Role-Based Access Control (RBAC), Express Middleware
Concepts — ES6+ JavaScript, Error Handling Middleware, MVC Architecture, Route-Controller-Model Structure, Async/Await, Mongoose Schema Design

Projects

- Hospital Management System** 
- Designed and built a full-stack Hospital Management System with 4 user roles (Admin, Doctor, Receptionist, Patient) using Next.js and MySQL.
 - Developed RESTful API endpoints for patient registration, appointment scheduling, doctor management, medical records, prescriptions, and billing using Next.js API Routes.
 - Implemented JWT-based authentication and Role-Based Access Control (RBAC); designed a normalized MySQL database schema for users, patients, doctors, appointments, prescriptions, and invoices.
 - Built responsive role-based dashboards, protected routes, form validation, and integrated the frontend with backend APIs using Axios.
 - Applied a modular project structure with reusable components, service layers, and clean coding practices; tested all API endpoints using Postman.
 - Used Git for version control and implemented robust input validation, error handling, and secure API communication.
- Hotel Booking System**
- Designed and developed a responsive Hotel Booking System using Next.js, featuring separate Admin and Customerdashboards with role-based navigation.
 - Built modules for hotel and room listings, room search, availability checking, booking management, customer reviews, and booking history with reusable React components.
 - Developed the Admin Dashboard to manage hotels, rooms, bookings, customers, and reviews through complete CRUD operations, with data persisted in browser storage.
 - Developed the Customer Dashboard to browse hotels, search rooms, make bookings, view booking history, submit reviews, and manage profile information.
 - Implemented responsive UI, form validation, loading states, error handling, and clean component-based architecture using Next.js, TypeScript/JavaScript, Axios, and Git.

Experience

Frontend Developer
Generation Next
July 2025 – July 2026

- Developed and deployed 5+ responsive business websites using HTML5, CSS3, Bootstrap, JavaScript, and WordPress.
- Designed and customized website layouts, themes, and UI components based on client requirements.
- Optimized websites for mobile responsiveness, cross-browser compatibility, and improved user experience.
- Improved website performance by optimizing images, reducing page load times, and implementing front-end best practices.
- Performed website debugging, bug fixing, security updates, and regular maintenance to ensure reliable performance.
- Managed website deployment, domain configuration, hosting, SSL certificates, and server maintenance.
- Collaborated directly with clients to gather requirements, provide project updates, and deliver projects within deadlines.
- Maintained and updated existing websites by adding new features, fixing issues, and improving functionality.

Education

Bachelor of Computer Applications (BCA)
Shivaji University, Kolhapur 75%
April 2025

Certificates

React Development Certificate — Issuer: The Kiran Academy | React Js
